## Manager Engineering

### Essential Responsibilities

- The Manager Engineering is responsible for and authorised to ensure clear technical orders and instructions to the Operations Department staff, as well as the clarification of and formatting of customer's technical orders and maintenance program into internal Work Specifications.
- The Manager Engineering has full administrative authority over the Engineering Department, and is also authorized to initiate immediate reporting to customers on malfunction and defects.
- Provide engineering support to the Operations Department, on engine repairs and alteration, configuration control and maintenance data issues.
- Provide engineering support to the EASA-145 organisation in obtaining its business and production plans inclusive supporting special defined projects delegated by the GM.
- Supporting third party customers as outlined in duly signed contracts.
- Develop internal technical engineering procedures and standards and obtain authority and customer approval of these as required
- Evaluate improvements and modifications (Ref. Service Bulletins etc.), repairs inclusive communication with applicable customer, vendors, OEM's etc.
- Coordinate the control of technical documentation as per EASA- 145 inclusive revisions.
- Perform corrective action of discrepancies reported by audits.
- Co-ordinate with customer in maintenance programs
- Reporting deviations within the EASA- 145 organisation as required per. and Part-145.A.60.
- Initiate and organize the development of new repairs and apply necessary approvals.

### Other Responsibilities

- Perform work in compliance with all applicable regulations and requirements.
- Ensure procedures and descriptions related to engineering processes are kept updated in MOE, BMS system and related maintenance documents outlined by regulatory authorities.

### Qualifications

- Degree in Engineering or equivalent formal education
- Minimum five to eight years aviation experience with Aircraft Engines type CFM56-3, CFM56-7B or CFM56-5B of which at least five years should be practical maintenance experience with hands-on technical leadership and people management experience
- Good English skills

### Abilities

- Excellent communication skills
- Solution oriented
- Responsible
- Efficient and accurate

### We can offer

- The opportunity to learn and develop your career in an exciting industry.
- You will feel fully involved in the day to day operations of the business and will be able to influence the continued success and growth of a rapidly growing organization.
- Whilst we all work very hard, we have a culture that's relaxed and down-to-earth, positive and professional.
- A proactive approach to constantly improving processes to ensure a rewarding working day and a good work life balance.
