PRESS RELEASE

IMMEDIATE RELEASE – June 2017

Aero Norway presents Supplier Award 2016 to Chromalloy

Left to right: Øyvind Dagsland, Team Leader Stores & Procurement at Aero Norway presenting the award to Gavin Connolly, EMEA Regional Account Manager at Chromalloy

Stavanger, June 5th 2017: Norway-based engine MRO facility [Aero Norway AS](#) has chosen Chromalloy to receive its Supplier Award 2016. Along with forty other repair and spare parts suppliers Chromalloy was measured continuously across a range of criteria including: on time delivery; quality; correct invoices; quality of engineering reports; and shipping costs.

Supplier performance audits in these areas help Aero Norway to choose key supplier/partners and work closely with them to sustain customer support of the highest standard. Ensuring that critical parts arrive on time without quality issues, making certain that these

are accompanied by the correct accounting paperwork, and also effectively managing logistics/shipping costs, eases the workload at Aero Norway, leaving the engine MRO facility to focus on other important areas for customers.

Aero Norway rigorously measures all suppliers on a monthly basis and gives feedback accordingly. The monitoring system also enables the organisation to provide genuine and credible opinions when it receives a market feedback analysis request from vendors. Stringent supplier bench-marking is an ongoing process at Aero Norway and part of its commitment to maintaining customer value.

Chromalloy provides commercial airlines and MRO providers like Aero Norway with a wide range of innovative, high-technology repair options that can eliminate scrap, reduce costs and extend the life of high-valued engine components. The Company has more than sixty years of experience in component repair resulting in value-added solutions that reduce operating costs and extend engine life.

Aero Norway AS is an authorised CFM repair station based in Stavanger Airport, Sola, Norway with the capacity for 120 engines per year. The modern facility was designed specifically to provide MRO services for CFM56® engine variants and is fully equipped with all the necessary equipment to provide high quality maintenance services with industry recognised EGT margins for CFM56-3, CFM56-5B and CFM56-7B engines. Aero Norway AS purchased the Norway Engine Centre from Pratt & Whitney in 2013 and offers a full range of engine MRO services: engine repair & overhaul; maintenance & repairs; engine test cell runs; full restoration; back shop parts repair; engine investigation; special customer requests; and non-destructive testing & diagnostics.
