

AERO
NORWAY
Quality Engines

On behalf of Killick I wanted to send you this note which I would like you to share with everyone at Aero Norway involved in this top case repair performed on site in Montpellier, France.

We were very impressed with the speed of response, the hands-on approach, the professional handling, the clear and on time communication during the preparation, as well as during the actual intervention and the quality of the work delivered by the Aero Norway team. Rob who was on site informed me several times that he was impressed with all aspects of the job performed by the team.

Obviously we are very happy with the outcome and would like to extend our gratitude to Aero Norway.

This certainly left a very positive impression with Killick and we see this as an excellent basis for future co-operation when we require on site interventions, or would have shop visits on any of our engines. Rest assured that Aero Norway is number one on our list of shops to contact.

Needless to say that the Killick team is always ready to assist the Aero Norway shop with any material requests you may have to support engines you have in your shop, as we have a large stock of CFM56-5B and CFM56-7B material in OH condition or NS condition with full BTB trace and excellent paperwork.

Bjorn Vandekerckhove - Vice President Powerplant, Killick Aerospace
