Manager Supply Chain

The Manager supply Chain is responsible for leading, planning, directing and coordinating all matters related to stores / warehousing, shipping and procurement of engines, modules and parts, including repair, service level agreements and non-engine related purchasing.

The main objective of this position is the management of supply chain to improve the value to Aero Norway, reduce TAT & hence improve OTD and to improve accuracy of services to Aero Norway's customers, vendors or partners in accordance to det COO or the CEO's direction to achieve long term business growth and profitability goals. The focus is on smart growth, high efficiency and delivering a trusted experience to customers and partners worldwide.

Job description

- Work in accordance with approved Aero Norway strategic business plan and implement strategy, policies and financial goals within supply chain management
- Overall responsibility for Purchasing, planning, shipping, warehouse and incoming inspection
- Ensure that supply chain projects are economical within budgets and that reports to management are fully updated and that the work is according to the vendor contracts
- Overall responsibility for all material movement and on time delivery to projects
- Vendor management
- Inventory analysis
- Responsible for all stores & warehouse metrics to meet agreed goals
- Development of employees through planning and meeting the growth needs of the company
- Drive the department for continuous improvements and champion change
- Work across organizational boundaries to assist other departments

- Work with finance to create budgets for production to meet yearly needs and goals. Ensure budgets are not exceeded
- Ensure compliance with all applicable EH&S requirements within health, environment and safety requirements
- Ensure compliance with all company policies and with all local and national laws and regulations in the area of Quality, Finance and Ethics.

Education / preference

- Academical degree preferably within Materials Management / Supply Chain or Bachelor's degree in a related field.
- + 5 years of related work experience and a thorough knowledge of supply chain principles and environmental practices, procedures and legal requirements.
- Fluent English language skills, verbal, reading and writing. Any other languages are an advantage

Experience

- Proven track record in a Production/manufacturing industry in terms of building relations within an international and /or intercultural environment.
- Particular strong skills in planning & delivery, focusing on and improving results, negotiations, and digital procurements benefits
- Demonstrable skills in managing people and teams in a high performance and technical organization.

We can offer:

- The opportunity to learn and develop your career in an exciting industry.
- You will feel fully involved in the day to day operations of the business and will be able to influence the continued success and growth of a rapidly growing organization.
- Whilst we all work very hard, we have a culture that's relaxed and down-to-earth, positive and professional.
- A proactive approach to constantly improving processes to ensure a rewarding working day and a good work life balance.
