Production Engineer - Repair Processes

Aero Norway has capability of ca. 1400 internal repair and access to over 1000 external repairs. We continuously upgrade repair services and extending repair capabilities for engine parts and components as part of our overall business strategy

Job description

- Be subject matter expert of CFM56 -3/-5/-7 part repair and repair processes.
- Supports the inspection teams to evaluate part damage to determine reparability or deviation requests, and hence coordinate repair requests and activities with internal/external parties and OEM.
- Support various operations department with implementing new or updated cleaning, inspection or repair work specifications and plans in line with approved technical data.
- Owner of the Aero Norway repair catalogue and responsible to keep catalogue up-to-date, including prices
- Develop and optimize the Aero Norway CFM56 strategic repair business portfolio, including evaluation of new repairs in house and supporting equipment used in new repairs (shot/ glass bead peening, machining, plasma spray, NDT, welding etc.)
- Liaise with local and global repair vendors for technical reviews
- Overall project management when introducing new equipment and/or machines.
- Support the Customer Focus Team in the decision to find commercially viable solution for major modules repairs.
- Participate in the Aero Norway's Lean program.
- Carry out tasks given by the Engineering manager
